

**AMENDMENTS TO THE SPECIFICATION****IN THE SPECIFICATION:**

Page 21

Please amend the Specification on page 21 beginning at line 21 as follows:

Furthermore, the phosphazene compounds may have various forms such as liquid, wax and solid though it depends on the kind of the substituents or the structure of the compounds. They may have any forms so long as the effects of the present invention are not damaged. In the case of solid form, the bulk density is preferably  $0.45 \text{ g/cm}^3$  or greater, more preferably  $0.45 \text{ g/cm}^3$  or greater, and more preferably  $0.75 \text{ g/cm}^3$  or less.

Page 37

Please amend the Specification on page 37 beginning at line 13 as follows:

The blending ratio when the aromatic resin of the component (C) is added is such that the weight ratio of the component (C) and the component (B) is  $(C)/(B)=95/5-5/95$ , especially preferably  $(C)/(B)=90/10-10/95$  10/90.
